

BAND AND KEY

A DIVISION OF HUNDUR HOSPITALITY

Product catalogue 2026

RFID and NFC, made for your brand.

RFID and NFC are all we do.

Band and Key is the RFID and NFC division of Hundur Hospitality. We supply wristbands, cards, fobs, tags, labels and readers to festivals, events, hotels, attractions and businesses, and focus on getting three things right: compatibility with your systems, quality of print, and delivery when you need it.

- 01

Works with your systems

Door locks, access control, cashless tills or ticket scanners: tell us what you run and we match the chip, with test samples if there is any doubt.
- 02

Printed to your brand

Full-colour, foil, engraved or debossed. Every card and band is made with your artwork, not a stock design.
- 03

Every chip tested

Cards and bands are read-tested before packing, so a dead key never reaches your front desk.
- 04

Everything RFID, one team

Wristbands, cards, fobs, tags, labels and readers from one team, on one quote, whatever you are running.

HOW ORDERING WORKS

- 01

Request

Tell us the product, rough quantity and your lock or access system.
- 02

Compatibility

We confirm the chip for your system and send test samples where needed.
- 03

Proof

You approve a digital proof of your artwork on the product.
- 04

Production

Cards and bands are printed, chipped and read-tested one by one.
- 05

Delivery

Shipped to your property, packed and labelled by batch.

IN THIS CATALOGUE

Key Cards & Smart Cards	19 products	Operations & Asset Tracking	15 products
RFID Wristbands	18 products	Tickets, Passes & Parking	4 products
Key Fobs, Tags & Labels	9 products	Finishes and lock compatibility	Guide
NFC for Guest Engagement	7 products		

Key Cards & Smart Cards

The key card is the first thing a guest holds and the thing they carry all stay. We supply RFID and NFC key cards in PVC, recycled plastic, paper and real wood, printed to your brand and fitted with the chip your locks read. Tell us your lock system and we confirm compatibility before anything is printed.

HOTEL & SMART KEY CARDS

RFID Hotel Key Cards

Full-colour PVC key cards with the chip your door locks read, printed edge to edge with your artwork.

Size	CR80, 85.6 x 54 mm, 0.76 mm or 0.84 mm thick
Chip	Matched to your lock system: MIFARE Ultralight, Ultralight C, Mini, Classic 1K or Classic 4K (13.56 MHz), or 125 kHz
Printing	Full colour CMYK both sides, Pantone matching available
Finish	Gloss, matt or soft-touch
Options	Magnetic stripe, signature panel, hologram, QR code or barcode, printed, embossed or laser-engraved numbering, hole punch
Lock systems	Cards for Saflok, Onity, Kaba, Salto, MIWA and VingCard systems, confirmed against your locks before printing

Lead time 4–8 weeks

Options Full-bleed artwork on both sides · Gold or silver hot-stamp foil · Spot UV, glitter or metallic finish · Hologram · PVC · Recycled PVC and PET-G on request

HOTEL & SMART KEY CARDS

Coloured Core Key Cards

Key cards made from PVC that is coloured all the way through, so the edges match the face.

Size	CR80, 86 x 54 mm, 0.84 mm thick, or custom
Core	Solid-colour PVC, coloured through the edge
Standard cores	Black (Pantone 419C), blue (2728C), red (1945C), green (347C), yellow (116C)
Chip	HF 13.56 MHz (MIFARE family) or UHF, matched to your locks
Finish	Matt, gloss or soft-touch

Lead time 4–8 weeks

Options Hot-stamped gold or silver foil · Spot UV or single-colour print · Laser-engraved numbering · Coloured core PVC

HOTEL & SMART KEY CARDS

NFC & MIFARE Smart Cards

Contactless smart cards for door access, cashless payment and loyalty, with the chip of your choice.

Size	CR80, 85.6 x 54 mm
Chips	MIFARE Classic 1K/4K, MIFARE Ultralight EV1, MIFARE DESFire, NTAG213/215/216
Frequency	13.56 MHz (ISO 14443A)
Printing	Full colour both sides
Options	Serial numbering, UID printing, pre-encoding where your system allows

Lead time 4–8 weeks Options Full-colour print · Foil and spot finishes · PVC · PET-G · Recycled PVC

HOTEL & SMART KEY CARDS

Magnetic Stripe & Dual-Technology Cards

Magnetic stripe key cards, with an optional RFID chip for properties moving between lock systems.

Size	CR80, 85.6 x 54 mm
Stripe	HiCo (2750 Oe) or LoCo (300 Oe)
Chip	Optional 13.56 MHz or 125 kHz
Printing	Full colour both sides

Lead time 4–8 weeks Options Full-colour print both sides · PVC

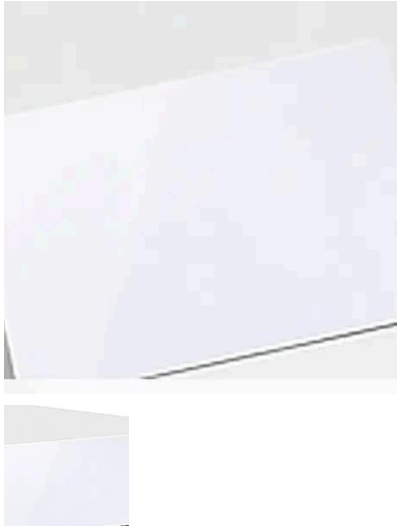

HOTEL & SMART KEY CARDS

Transparent & Frosted Cards

Clear or frosted cards that show off the chip inside, for a key card that looks different.

Size	CR80, 85.6 x 54 mm
Base	Clear or frosted PVC or PET
Chip	Matched to your system
Printing	Colour plus white underprint

Lead time 4–8 weeks Options Colour and white print on clear or frosted base · PVC · PET

HOTEL & SMART KEY CARDS

Blank Printable Key Cards

Plain white RFID cards for printing in-house on a card printer, with the chip already inside.

Size	CR80, 85.6 x 54 mm
Surface	Glossy white, suitable for dye-sublimation and retransfer printers
Chip	13.56 MHz or 125 kHz, matched to your system
Packing	Shrink-wrapped in packs of 100 or 200

Lead time 4–8 weeks **Options** Printed on site by you · PVC

HOTEL & SMART KEY CARDS

Inkjet-Printable PVC Cards

Blank cards with a coated surface you print yourself on a desktop inkjet printer, with the chip already inside.

Size	CR80, 86 x 54 mm
Surface	Inkjet-receptive coating, gloss or matt; dye-sublimation versions available
Chip	HF 13.56 MHz (MIFARE or NFC) or 125 kHz
Printers	Inkjet printers with a PVC card tray

Lead time 4–8 weeks **Options** Printed by you · PVC

HOTEL & SMART KEY CARDS

Mini & Half-Size Cards

Smaller-than-standard cards for key rings, tags and compact passes, with the same chip options as full-size cards.

Sizes	CR50 and other mini formats; custom sizes to order
Chip	HF 13.56 MHz (MIFARE or NFC) or 125 kHz
Printing	Full colour both sides
Options	Hole punch, numbering, barcode or QR code

Lead time 4–8 weeks **Options** Full-colour print · Numbering and codes · PVC

WOOD, PAPER & RECYCLED

Wooden RFID Key Cards

Real wood key cards with an embedded chip: a plastic-free key that guests notice and keep.

Size	CR80, 86 x 54 mm, about 1.5 mm thick, or custom shapes
Materials	Bamboo, cherry, maple, walnut or basswood veneer
Chip	HF 13.56 MHz matched to your lock system, or UHF
Marking	Laser engraving or full-colour UV print
Finish	Natural or sealed

Lead time 4–8 weeks **Options** Laser-engraved logo and design · Full-colour UV print · Bamboo · Cherry · Maple · Walnut

WOOD, PAPER & RECYCLED

Recycled & Bio-Based Key Cards

Key cards made from recycled PVC, PET-G or bio-based plastic, printed just like standard cards.

Size	CR80, 85.6 x 54 mm
Materials	Recycled PVC, PET-G or bio-based PVC
Chip	Matched to your lock system
Printing	Full colour both sides

Lead time 4–8 weeks **Options** Full-colour print both sides · Recycled PVC · PET-G · Bio-based PVC

WOOD, PAPER & RECYCLED

Paper Key Cards

Plastic-free key cards made from layered paper, rigid enough for daily use and recyclable afterwards.

Size	CR80, 85.6 x 54 mm
Material	Layered paper board, kraft or white
Chip	Matched to your lock system
Printing	Full colour or one-colour on kraft

Lead time 4–8 weeks **Options** Full-colour print · One-colour print on kraft · Paper board

MEMBERSHIP, GIFT & PROMO CARDS

Membership & VIP Cards

Premium cards for spa, club and loyalty members, with photo, barcode and chip options.

Size	CR80, 85.6 x 54 mm
Finishes	Metallic, glitter, foil, embossing, spot UV
Personalisation	Names, numbers, photos, barcodes
Chip	Optional, matched to your system
Lead time 4–8 weeks	Options Foil, embossing and special finishes · PVC · PET-G

MEMBERSHIP, GIFT & PROMO CARDS

Gift Cards & Vouchers

Branded gift cards and vouchers for spas, restaurants and shops, with barcodes, codes or a chip for redemption.

Size	CR80, 86 x 54 mm, or custom
Data	Unique numbers, barcodes, QR codes or magnetic stripe
Chip	Optional 13.56 MHz (NFC or MIFARE)
Finishes	Foil, spot UV, scratch-off panel
Lead time 4–8 weeks	Options Full-colour print · Foil and spot UV · Unique codes · PVC · Paper

MEMBERSHIP, GIFT & PROMO CARDS

Scratch-Off Cards

Promotional and prize cards with a scratch-off panel hiding a code, PIN or prize, with an optional chip.

Size	CR80, 86 x 54 mm, or custom
Panel	Silver scratch-off panel, any size or position
Data	Unique codes, PINs or prizes printed per card
Chip	Optional 13.56 MHz (NFC or MIFARE)
Lead time 4–8 weeks	Options Full-colour print both sides · Unique codes under the panel · PVC · Paper

MEMBERSHIP, GIFT & PROMO CARDS

Combo Cards with Snap-Off Key Tags

A membership card with one or more mini key tags that snap off for the guest's key ring.

Format	CR80 card with one, two or three snap-off key tags
Chip	Optional 13.56 MHz (NFC or MIFARE) or 125 kHz in card and tags
Printing	Full colour both sides
Data	Matching numbers, barcodes or QR codes on every part
Lead time 4–8 weeks	Options Full-colour print both sides · Matching numbering and barcodes · PVC

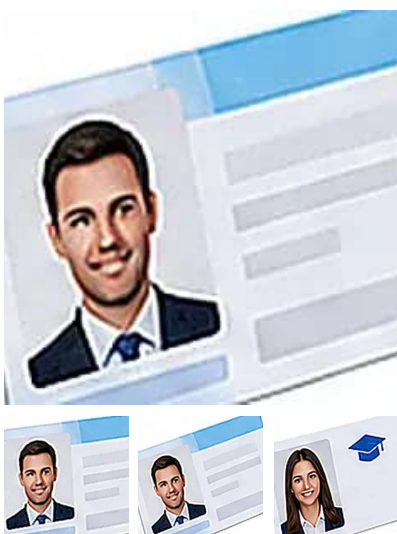

MEMBERSHIP, GIFT & PROMO CARDS

RFID Blocking Cards

Wallet-sized cards that shield nearby bank cards from contactless skimming, printed as a branded guest gift.

Size	CR80, 86 x 54 mm, wallet sized
Function	Helps shield 13.56 MHz contactless cards held in the same wallet
Printing	Full colour both sides
Finish	Gloss or matt; foil and spot UV available
Lead time 4–8 weeks	Options Full-colour print both sides · Foil or spot UV · PVC

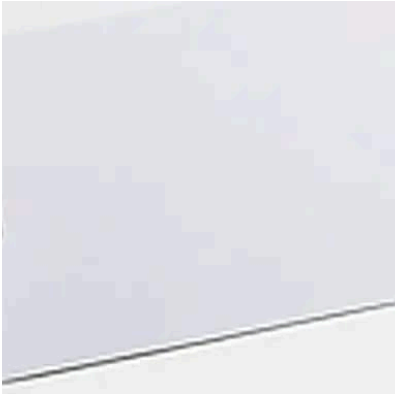

ID & ACCESS CARDS

Staff Photo ID Cards

Personalised staff and member ID cards with photo, name and number printed per person, plus the chip your doors read.

Size	CR80, 86 x 54 mm
Personalisation	Photo, name, role, number and barcode printed per card
Chip	125 kHz, 13.56 MHz (MIFARE family) or UHF, matched to your system
Options	Slot punch, magnetic stripe, signature panel, hologram
Lead time 4–8 weeks	Options Personalised print per card · Hologram overlay · PVC · Bio-based PVC

ID & ACCESS CARDS

Slot-Punched Access Cards

Staff and contractor access cards with a punched slot, so they clip to a lanyard or badge reel.

Size	CR80, 86 x 54 mm, 0.84 mm thick
Chip	125 kHz proximity or 13.56 MHz (MIFARE family), matched to your access system
Slot	Vertical or horizontal, for a clip, lanyard or badge reel
Printing	Full colour both sides; photo, name and number printed per card
Options	Magnetic stripe, signature panel, barcode or QR code

Lead time 4–8 weeks **Options** Full-colour print both sides · Photo ID and variable data per card · PVC

ID & ACCESS CARDS

UHF Long-Range ID Cards

ID cards that a fixed reader picks up from several metres away, for hands-free staff entry and time records.

Frequency	UHF 860 to 960 MHz (EPC Gen 2); dual-frequency with 13.56 MHz on request
Read range	Several metres with a fixed UHF reader, depending on the reader and surroundings
Size	CR80, 86 x 54 mm
Printing	Full colour both sides; photo, name and number per card

Lead time 4–8 weeks **Options** Full-colour print both sides · Photo ID and numbering · PVC

RFID Wristbands

A wristband keeps the key on the guest, not in a bag by the pool. We supply silicone bands for all-week wear, fabric bands for multi-day events and single-use bands for day passes, each with a chip that can open doors, pay at the bar and admit guests to restricted areas.

SILICONE

Adjustable Silicone Wristbands

Waterproof silicone bands with a watch-style clasp, so one size fits every adult and child.

Material	Soft, hypoallergenic silicone
Fit	Adjustable watch-strap or buckle clasp
Chip	Sealed; LF 125 kHz, HF 13.56 MHz or UHF, or dual frequency
Water resistance	Fully waterproof
Branding	Printed, debossed or embossed logo

Lead time 4–8 weeks **Options** Screen-printed logo · Debossed or colour-filled logo
· Laser engraving · Silicone

SILICONE

Pool & Waterpark Wristbands

One-piece stretch silicone bands for pools, spas and waterparks: nothing to unclip, nothing to lose.

Material	Stretch silicone, one piece
Sizes	Diameters from child to adult XL
Chip	Sealed; matched to your lockers and gates
Water resistance	Fully waterproof, chlorine and salt resistant

Lead time 4–8 weeks **Options** Printed or debossed logo · Silicone

SILICONE

Classic RFID Silicone Wristbands

Durable closed silicone bands for staff, members and repeat guests, reusable for years.

Material	Silicone
Chip	LF 125 kHz, HF 13.56 MHz or UHF, or dual frequency
Life	Reusable; suitable for cleaning and reissue
Branding	Printed, debossed or colour-filled logo
Lead time 4–8 weeks	Options Screen-printed logo · Debossed or colour-filled logo · Laser engraving · Silicone

SILICONE

Long-Range UHF Wristbands

UHF wristbands that read from a distance, for hands-free gates, lanes and attendance tracking.

Frequency	UHF 860 to 960 MHz; optional dual with 13.56 MHz
Read range	Several metres, depending on reader and antenna
Material	Silicone
Water resistance	Fully waterproof
Lead time 4–8 weeks	Options Printed or debossed logo · Silicone

FABRIC & ELASTIC

Elastic Fabric Wristbands

Soft stretch bands printed edge to edge with your design, comfortable enough to wear all week.

Material	Elastic polyester
Printing	Full-colour sublimation, edge to edge
Chip	LF 125 kHz, HF 13.56 MHz or UHF, matched to your systems, in a slim housing
Fit	Stretch; several lengths
Lead time 4–8 weeks	Options Full-colour sublimated pattern · Elastic polyester

FABRIC & ELASTIC

Woven Fabric Wristbands

Jacquard-woven bands with your design woven into the fabric, a sealed card tag and a one-way lock, for multi-day festivals.

Band	Jacquard-woven polyester, design woven in
Closure	One-way tamper-evident slider
Tag	PVC tag with sealed LF, HF or UHF chip; printed full colour with laser numbers, barcode or QR code
Wear	Showerproof; multi-day

Lead time 4–8 weeks **Options** Woven or printed band · Full-colour tag with numbering, barcode or QR code · Woven polyester · Recycled PET

FABRIC & ELASTIC

Polyester Festival Wristbands with Card Tag

Sublimation-printed polyester bands with a full-colour PVC card tag and a one-way slider: the classic festival band.

Band	Polyester, dye-sublimation printed both sides
Tag	PVC card tag, full-colour print, chip sealed inside
Chip	HF 13.56 MHz (NTAG213/216, MIFARE) or UHF
Closure	One-way slider (plastic or metal); adjustable versions available
Width	Typically 15 mm; other widths to order
Use	Single-use or multi-day; showerproof

Lead time 4–8 weeks **Options** Full-colour sublimated band · Printed card tag · Numbering, QR code or barcode on the tag · Polyester · Recycled PET · PVC tag

FABRIC & ELASTIC

Satin & Thermal-Printed Textile Wristbands

Smooth satin-ribbon bands printed in one or two colours, with a card tag and slider, for clubs, parties and short events.

Band	Satin ribbon, thermal-transfer printed
Tag	PVC card tag with sealed chip
Chip	HF 13.56 MHz (NFC or MIFARE) or UHF
Closure	One-way slider
Use	Single-use, short events

Lead time 4–8 weeks **Options** One or two-colour printed band · Printed card tag · Satin polyester · PVC tag

FABRIC & ELASTIC

Elastic Wristbands with Card Tag

Stretch bands printed with your design and fitted with a PVC card tag, slipped on with no clasp for reusable access.

Band	Elastic polyester, full-colour printed
Tag	PVC card tag with sealed chip
Chip	HF 13.56 MHz (NFC or MIFARE), 125 kHz or UHF
Fit	Stretch, several lengths
Use	Reusable

Lead time 4–8 weeks **Options** Full-colour printed band · Printed card tag · Elastic polyester · PVC tag

FABRIC & ELASTIC

Cloth RFID Wristbands with Loop Lock

Woven fabric bands printed edge to edge with your design, a branded card tag that carries the chip, and an adjustable loop lock.

Band	Woven polyester, printed full colour on both sides
Tag	PVC card tag threaded onto the band, with the chip sealed inside
Chip	LF 125 kHz, HF 13.56 MHz (MIFARE family) or UHF, matched to your locks and systems
Closure	Loop lock: stud-and-socket fastener with a pull tab, through pre-punched holes
Fit	Adjustable; one length fits most adults and children
Extras	Keeper loop for the loose end; numbering, QR code or barcode on the tag
Wear	Chip sealed in the tag, so the band can be worn in the pool and shower

Lead time 4–8 weeks	Options Full-colour pattern printed on both sides of the band · Logo printed on the tag in full colour or one colour · Numbering, QR code or barcode on the tag · Woven polyester · PVC tag · Recycled PET band on request
---------------------	--

FABRIC & ELASTIC

Elastic Message & Slogan Bands

Wide stretch bands printed with a message, slogan or verse all the way round, with a hidden chip for access or payment.

Band	Wide elastic polyester, printed all round
Chip	HF 13.56 MHz (NFC or MIFARE), sealed in a patch
Fit	Stretch
Use	Reusable keepsake

Lead time 4–8 weeks	Options Full-colour message printed all round · Elastic polyester
---------------------	--

FABRIC & ELASTIC

Eco Wristbands with Wooden Tag

Recycled-polyester fabric bands with a wooden tag in place of plastic, for festivals and resorts cutting single-use plastic.

Band	Recycled polyester (rPET), printed or woven
Tag	Wooden tag (bamboo or birch) with sealed chip
Chip	HF 13.56 MHz (NFC or MIFARE)
Closure	One-way slider; adjustable versions available
Marking	Laser engraving or full-colour print on the tag

Lead time 4–8 weeks **Options** Printed or woven band · Engraved or printed wooden tag · Recycled polyester · Bamboo · Birch

SINGLE-USE

Single-Use Paper Wristbands

Tear-resistant synthetic paper bands with a chip, for day passes, pool access and one-off events.

Material	Tyvek or waterproof polypropylene
Closure	Tamper-evident adhesive
Chip	HF 13.56 MHz, UHF optional
Extras	Sequential numbering, barcodes, QR codes

Lead time 4–8 weeks **Options** Full-colour print · Tyvek · Polypropylene

SINGLE-USE

Tyvek RFID Wristbands

Tear-resistant Tyvek bands with an RFID inlay and tamper-evident adhesive, the low-cost choice for day events.

Material	Tyvek (spunbonded polyethylene)
Chip	HF 13.56 MHz (NFC) or UHF inlay
Closure	Tamper-evident adhesive with security slits
Printing	Full colour or one colour, numbering and barcodes
Size	Standard 25 mm wide adult band

Lead time 4–8 weeks **Options** Full-colour or spot-colour print · Numbering and barcodes · Tyvek

SINGLE-USE

Vinyl Wristbands

Soft vinyl bands with snap closures, waterproof and sturdy enough for a long weekend.

Material	Soft PVC vinyl
Closure	Single-use snap
Chip	Sealed HF 13.56 MHz or UHF inlay
Water resistance	Waterproof
Printing	Screen-printed logo and text

Lead time 4–8 weeks Options Printed logo and text · Vinyl

SILICONE

Slim Sport Silicone Wristbands

Low-profile adjustable bands with the chip built into a slim face, for gyms, clubs, staff and cashless events.

Material	Soft silicone
Fit	Adjustable pin clasp with a row of holes
Chip	LF 125 kHz, HF 13.56 MHz (MIFARE or NFC) or UHF, sealed in the face
Water resistance	Waterproof
Branding	Debossed, printed or colour-filled logo

Lead time 4–8 weeks Options Debossed or printed logo · Laser-engraved numbers · Silicone

SILICONE

Chain-Link Silicone Bracelets

Fashion-style chain bracelets in soft silicone with a round chip face, for kids' clubs, parks and brand activations.

Material	Stretch silicone, chain-link design
Chip	HF 13.56 MHz (MIFARE or NFC) or 125 kHz, sealed in the round face
Fit	Slip-on, stretch to fit
Water resistance	Waterproof

Lead time 4–8 weeks Options Printed or debossed logo on the face · Silicone

SINGLE-USE

Thermal-Printable RFID Wristbands

Blank bands you print on the spot with names, dates or barcodes, then encode, for check-in desks and day passes.

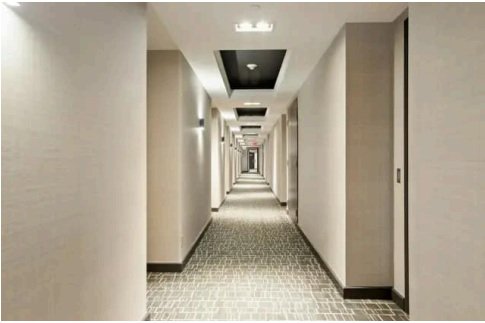

Material	Water-resistant synthetic, direct thermal printable
Chip	HF 13.56 MHz (NFC or MIFARE) or UHF inlay
Printing	On demand with a thermal wristband printer; pre-printed logo optional
Closure	Tamper-evident adhesive or snap
Supply	On rolls or cartridges to suit your printer

Lead time 4–8 weeks Options Pre-printed logo or colour band · Variable data printed on site · Synthetic thermal film

Key Fobs, Tags & Labels

Not every credential needs to be a card. Key fobs suit staff and residents who carry keys every day, epoxy tags hang from anything, and NFC stickers and labels turn surfaces and packaging into something a phone can read.

KEY FOBBS

RFID Key Fobs

Tough ABS fobs for staff, residents and long-stay guests who carry keys every day.

Material	ABS plastic
Chip	13.56 MHz, 125 kHz (e.g. EM4200, T5577) or dual frequency
Fitting	Metal split ring
Marking	Printed or laser-engraved logo and number
Lead time 4–8 weeks	Options Printed or engraved logo · Sequential numbering · ABS

EPOXY, LUGGAGE & DISC TAGS

Epoxy NFC Tags

Small, domed, waterproof tags on a cord or ring, printed full colour with your design.

Material	PVC or PET with epoxy dome
Chip	NTAG213/215/216, MIFARE or 125 kHz
Shapes	Round, square or custom
Fitting	Cord, ring or adhesive back
Lead time 4–8 weeks	Options Full-colour print under the dome · PVC · PET · Epoxy resin

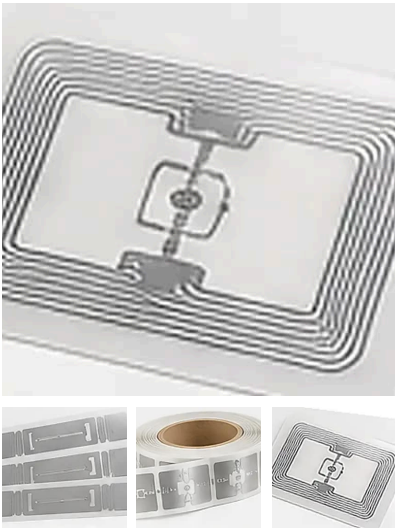

STICKERS, LABELS & INLAYS

NFC Stickers

Thin adhesive NFC stickers that turn any surface into something a guest can tap with a phone.

Chip	NTAG213, NTAG215 or NTAG216
Sizes	From 20 mm round; square and custom
Adhesive	Standard or on-metal backing
Supply	On rolls or sheets; blank or printed
Lead time	4–8 weeks
Options	Full-colour print or plain · PET · Paper · PVC

STICKERS, LABELS & INLAYS

Printable RFID Labels

HF and UHF labels on rolls for printing in-house, for inventory, packaging and asset tracking.

Frequency	LF 125 kHz, HF 13.56 MHz or UHF 840 to 960 MHz
Face	Coated paper, PP paper, PVC, PET, thermal paper or thermal PP; on-metal versions available
Printing	Full colour, screen print or Pantone; or blank for thermal-transfer printing
Data	QR codes, barcodes and serial numbers printed and encoded to match
Adhesive	Permanent 3M adhesive
Supply	On rolls to suit your printer core; custom sizes
Lead time	4–8 weeks
Options	Pre-printed or blank · Coated paper · PP paper · PVC · PET · Thermal paper

EPOXY, LUGGAGE & DISC TAGS

Luggage & Bag Tag Cards

Tough PVC tags with a strap slot for luggage storage, bag drop, valet and kids' club check-in.

Material	Rigid PVC
Attachment	Slot for a strap, loop or key ring
Chip	Optional: 13.56 MHz (NFC or MIFARE) or UHF
Printing	Full colour or solid colours; numbering, barcode or QR code
Lead time 4–8 weeks	Options Logo and numbering · Barcode or QR code · PVC

STICKERS, LABELS & INLAYS

Tamper-Evident RFID Labels

Labels that break apart if peeled off, for wine bottles, minibars, sealed stock and anything that must not be swapped.

Frequency	HF 13.56 MHz (NFC) or UHF 860 to 960 MHz
Security	Frangible face or void pattern; chip destroyed if the label is removed
Sizes	Round, square or custom
Supply	On rolls; blank or printed
Lead time 4–8 weeks	Options Logo, numbering or QR code printed · Frangible paper · PET

KEY FOBBS

Crystal & Acrylic Key Fobs

Clear epoxy and acrylic fobs with the copper antenna on show, for a premium, technical look on a key ring.

Body	Clear epoxy crystal or acrylic, antenna visible
Chip	HF 13.56 MHz (MIFARE or NFC) or 125 kHz
Shape	Teardrop, round or custom
Branding	Printed or engraved logo
Lead time 4–8 weeks	Options Printed or engraved logo · Epoxy · Acrylic

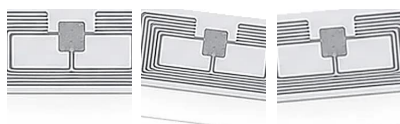

EPOXY, LUGGAGE & DISC TAGS

PVC Coin & Disc Tags

Tough round disc tags that screw, glue or tie onto pallets, bins, equipment and gates.

Sizes	Diameters from about 20 mm to 50 mm
Fixing	Centre hole, button holes or adhesive
Chip	LF 125 kHz, HF 13.56 MHz or UHF
Body	PVC or ABS, sealed and waterproof

Lead time 4–8 weeks **Options** Printed numbers or logo · PVC · ABS

STICKERS, LABELS & INLAYS

RFID Wet & Dry Inlays

Bare chip-and-antenna inlays on rolls, for adding RFID to your own labels, tickets, cards and packaging.

Types	Dry (no adhesive) or wet (adhesive-backed)
Frequency	HF 13.56 MHz (NFC) or UHF 860 to 960 MHz
Antennas	A range of shapes and sizes for different read ranges
Supply	On rolls, wound to suit your equipment

Lead time 4–8 weeks **Options** Not printed · PET film

NFC for Guest Engagement

A tap is quicker than a QR code. NFC stands, tags and cards send guests straight to your review page, digital menu, Wi-Fi details or booking link, and can be reprogrammed whenever the destination changes.

REVIEW STANDS, CARDS & TAGS

Acrylic NFC Counter Stands

Acrylic and PVC counter stands that send guests to your review page, menu or booking link with a tap.

Formats	Counter stands in several sizes and angles
Materials	Acrylic or PVC
Chip	NTAG213/215/216
Extras	Printed QR code as a fallback; reprogrammable

Lead time 4–8 weeks **Options** Full-colour print with your logo and call to action · Acrylic · PVC · Wood

NFC BUSINESS CARDS

NFC Business Cards

PVC and wood business cards that share contact details with a tap, for sales and events teams.

Size	CR80, 85.6 x 54 mm
Materials	PVC, frosted PVC or wood
Chip	NTAG213/215/216
Programming	Individual links per person

Lead time 4–8 weeks **Options** Full-colour print, foil or engraving · PVC · Frosted PVC · Wood

REVIEW STANDS, CARDS & TAGS

NFC Review Cards

Card-sized NFC tags staff hand to guests, or leave on tables, that open your review page with a tap.

Size	CR80, 86 x 54 mm
Chip	NTAG213, 215 or 216 (NFC)
Printing	Full colour, with a QR code fallback
Programming	Encoded with your link; reprogrammable
Lead time	4–8 weeks
Options	Full-colour print · QR code · PVC · Wood · Paper

REVIEW STANDS, CARDS & TAGS

Wooden NFC Stands & Plaques

Engraved wooden counter stands and wall plaques that link to your reviews, menu, Wi-Fi or social pages.

Formats	Counter stands and wall plaques, standard or custom shapes
Material	Bamboo or hardwood, laser-engraved or printed
Chip	NTAG213, 215 or 216 (NFC), plus QR code
Programming	Encoded with your link; reprogrammable
Lead time	4–8 weeks
Options	Laser-engraved or printed logo · QR code · Bamboo · Hardwood

REVIEW STANDS, CARDS & TAGS

Round NFC Table Tags

Round tap tags that sit flat on tables and bars, linking to menus, ordering, reviews or Wi-Fi.

Sizes	Round, typically 50 to 100 mm across
Material	Acrylic, PVC or wood
Chip	NTAG213, 215 or 216 (NFC), plus QR code
Fixing	Adhesive backing or free-standing
Lead time	4–8 weeks
Options	Printed or engraved logo · QR code · Acrylic · PVC · Wood

NFC BUSINESS CARDS

Wooden NFC Business Cards

Bamboo and wood business cards, engraved or printed, that share your contact details with a tap.

Size	CR80, 86 x 54 mm
Material	Bamboo, cherry, walnut or maple
Chip	NTAG213, 215 or 216 (NFC)
Marking	Laser engraving or full-colour UV print

Lead time 4–8 weeks **Options** Laser engraving · Full-colour UV print · Personalised per person · Bamboo · Cherry · Walnut

NFC BUSINESS CARDS

Clear Plastic Business Cards

Transparent and frosted business cards that stand out in a stack, with optional NFC.

Size	CR80, 86 x 54 mm, or custom
Material	Clear or frosted PVC, 0.38 to 0.76 mm
Printing	Full colour with white ink backing where needed
Chip	Optional NFC (NTAG213/215/216)

Lead time 4–8 weeks **Options** Full-colour print with white backing · Foil and spot UV · QR code · PVC

Operations & Asset Tracking

RFID works just as hard behind the scenes. Washable tags track linen through the laundry, cable-tie and on-metal tags follow assets around the property, and desktop readers let your team encode and check cards themselves. Hang tags, jewellery tags and security tags look after stock in resort boutiques and gift shops.

ASSET & LAUNDRY TRACKING

Washable Laundry Tags

Heat and chemical-resistant tags that track towels, linen and uniforms through every wash.

Frequency	UHF 860 to 960 MHz or HF 13.56 MHz
Types	Silicone, textile and button tags
Durability	Rated for industrial washing, tumble drying and ironing
Fitting	Sewn in, heat-sealed or pocketed

Lead time 4–8 weeks Options Printed text or numbering on textile tags · Silicone · Textile · PPS

ASSET & LAUNDRY TRACKING

RFID Cable-Tie Tags

Self-locking tags for luggage, loaned equipment, furniture and anything that needs to be tracked.

Materials	ABS tag on a nylon tie
Frequency	HF 13.56 MHz or UHF
Closure	Self-locking, tamper-evident
Small	90 x 28 mm tag, 350 mm tie; reads up to about 5 m (UHF)
Medium	103 x 30 mm tag, 400 mm tie; reads up to about 6 m (UHF)
Large	125 x 35 mm tag, 400 mm tie; reads up to about 8 m (UHF)
On-metal	125 x 37 mm tag, 400 mm tie, for metal frames and cages; reads up to about 10 m (UHF)

Lead time 4–8 weeks Options Printed logo and numbering · Nylon · ABS

ASSET & LAUNDRY TRACKING

On-Metal Asset Tags

Rugged tags designed to read reliably when mounted on metal equipment, carts and fixtures.

Frequency	UHF 860 to 960 MHz or HF 13.56 MHz
Housing	ABS, PCB or flexible foam
Mounting	Adhesive or screw-fixed
Environment	Suitable for indoor and outdoor use
Lead time 4–8 weeks	Options Printed numbering or logo · ABS · PCB · Foam

READERS & ENCODERS

Desktop RFID Readers & Encoders

USB desktop readers for checking, reading and writing cards, wristbands and tags at the desk.

Frequency	13.56 MHz (ISO 14443A); 125 kHz models available
Connection	USB; some models with Wi-Fi
Read range	Up to about 5 to 10 cm
Compatibility	Windows, with SDK for developers
Lead time 4–8 weeks	Options Logo label on request · ABS housing

READERS & ENCODERS

UHF Long-Range Readers

Panel readers that read UHF tags and wristbands from several metres, for gates, lanes and stock rooms.

Frequency	UHF 860 to 960 MHz (regional bands)
Read range	Several metres, depending on tag and setting
Interfaces	USB, RS-232, RS-485 or Ethernet by model
Mounting	Pole or wall mount
Lead time 4–8 weeks	Options Not applicable · ABS housing

RETAIL & BOUTIQUE TAGS

RFID Hang Tags

Branded swing tags with a hidden RFID inlay, for fast stock counts in resort boutiques and gift shops.

Material	Coated card or synthetic paper
Chip	UHF inlay (EPC Gen 2); NFC on request
Printing	Full colour both sides, foil or spot UV; barcodes and variable data
Attachment	String, loop or plastic fastener
Lead time 4-8 weeks	Options Logo printed both sides · Foil or spot UV · Barcode, price or variable data · Card · Synthetic paper

READERS & ENCODERS

Wall-Mounted Access Control Readers

Card readers for staff doors, gyms, spas and car parks that connect to your access control system.

Frequency	13.56 MHz (MIFARE family), 125 kHz, or both
Output	Wiegand 26 or 34, or RS485, to your access control panel
Mounting	Surface mount, beside the door
Feedback	LED and buzzer
Environment	Indoor; weatherproof models for outdoor gates
Lead time 4-8 weeks	Options Logo label on request · ABS housing

READERS & ENCODERS

Handheld UHF RFID Readers

Pistol-grip readers that count hundreds of tagged items in seconds: linen, assets and boutique stock.

Frequency	UHF 860 to 960 MHz (EPC Gen 2); HF models available
Read range	Up to several metres, depending on the tag
Connection	Bluetooth or USB; some models run Android with a built-in screen
Battery	Rechargeable, for a full shift
Software	Works with inventory apps; SDK for developers
Lead time 4-8 weeks	Options Logo label on request · Rugged plastic housing

ASSET & LAUNDRY TRACKING

Active RFID Tags

Battery-powered tags that broadcast their position, for tracking vehicles, carts and high-value equipment.

Power	Built-in battery; life of several years depending on how often it broadcasts
Frequency	433 MHz or 2.4 GHz, matched to your readers
Range	Tens of metres, depending on the system and surroundings
Housing	Rugged ABS with screw lugs; adhesive mounting available
Lead time 4–8 weeks	Options Logo or number label · ABS

RETAIL & BOUTIQUE TAGS

Jewellery RFID Tags

Small loop tags for rings, watches and jewellery in resort boutiques, with a chip and printed code.

Attachment	Soft plastic loop
Chip	UHF inlay (EPC Gen 2)
Printing	Barcode, QR code, price or item code
Size	Small, to sit discreetly in a display
Lead time 4–8 weeks	Options Item codes, barcodes or QR codes · Logo on request · Plastic · Synthetic paper

RETAIL & BOUTIQUE TAGS

Anti-Theft Security Tags

Reusable hard tags for clothing and accessories in resort boutiques, matched to your security gates.

Technology	Acousto-magnetic (58 kHz) or radio frequency (8.2 MHz), matched to your gates; UHF RFID versions available
Attachment	Pin and clutch, removed with a detacher at the till
Housing	ABS
Use	Reusable
Lead time 4–8 weeks	Options Not usually printed · ABS

LIVESTOCK & ANIMAL TAGS

RFID Animal Ear Tags

Two-piece TPU ear tags with a chip, for identifying and tracking cattle, pigs, sheep and other livestock.

Frequency	LF 134.2 kHz (ISO 11784/11785, FDX-B) or 125 kHz; HF 13.56 MHz and UHF versions available
Format	Two-piece button tag, male and female
Material	TPU, flexible in heat and cold
Fitting	With a standard ear tag applicator
Marking	Laser-printed numbers or text
Lead time	4–8 weeks
Options	Laser-printed numbers or farm name · TPU

ASSET & LAUNDRY TRACKING

RFID Nail Tags

Spike-shaped tags that hammer into wooden pallets, posts, trees and tools for permanent identification.

Fixing	Hammered or pressed into wood and soft materials
Chip	UHF 860 to 960 MHz or HF 13.56 MHz
Body	ABS or nylon, sealed
Uses	Pallets, posts, trees, timber and tools
Lead time	4–8 weeks
Options	Not usually printed · ABS · Nylon

RETAIL & BOUTIQUE TAGS

UHF Garment & Care Labels

Sew-in and heat-transfer care labels with a UHF chip, for uniforms, rental linen and retail clothing.

Types	Sew-in fabric labels or heat-transfer labels
Chip	UHF 860 to 960 MHz
Durability	Rated for repeated washing and ironing
Printing	Logo, size and care symbols
Lead time	4–8 weeks
Options	Logo, size and care printing · Satin · Polyester · Heat-transfer film

READERS & ENCODERS

Desktop UHF Readers & Encoders

USB desktop readers for writing and checking UHF labels, tags and wristbands at a desk or packing station.

Frequency	UHF 860 to 960 MHz (EPC Gen 2)
Connection	USB
Read range	Short range, for one item at a time on the desk
Software	Works with inventory apps; SDK for developers
Lead time 4-8 weeks	Options Logo label on request · ABS housing

Tickets, Passes & Parking

For events, attractions and car parks: RFID paper and PVC tickets, chipped event badges and VIP passes for fast, trackable entry, and long-range UHF parking cards and windscreen tags that open barriers as vehicles arrive.

TICKETS, BADGES & PASSES

RFID Tickets & Passes

Paper and PVC tickets with an embedded chip, for fast, trackable entry to events and attractions.

Materials	Coated paper, thermal paper or PVC
Chip	HF 13.56 MHz or UHF
Formats	Card-size, fan-fold or custom
Extras	Numbering, barcodes, QR codes
Printing	Full-colour offset, thermal transfer or direct thermal
Lead time 4–8 weeks	Options Full-colour print · Coated paper · Thermal paper · PVC

TICKETS, BADGES & PASSES

RFID Event Badges & VIP Passes

Full-colour PVC passes for conferences, VIP areas, backstage and crew, with a chip for access control and a lanyard slot.

Sizes	CR80 (86 x 54 mm) or larger custom badge formats
Chip	HF 13.56 MHz (NFC or MIFARE) or UHF for hands-free lanes
Printing	Full colour both sides; names, roles and numbers printed per pass
Security	Hologram, UV ink or numbered serials
Fitting	Slot or hole for a lanyard, clip or badge reel
Lead time 4–8 weeks	Options Full-colour print both sides · Personalised names and roles · Hologram · PVC · Paper · Bio-based PVC

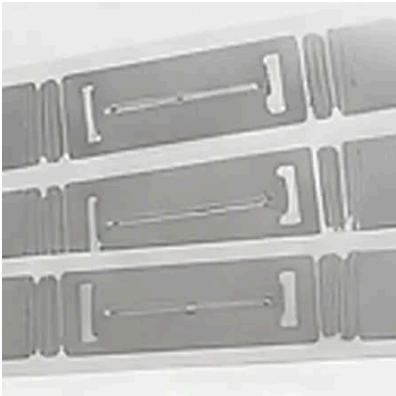

PARKING & VEHICLE

UHF Parking Cards

Windscreen cards that open the car park barrier as the car approaches, for staff, residents and long-stay guests.

Frequency	UHF 860 to 960 MHz (EPC Gen 2)
Read range	Several metres with a fixed UHF reader at the barrier, depending on the reader and windscreen
Size	CR80, 86 x 54 mm
Mounting	Windscreen holder or dashboard
Printing	Full colour, with permit numbers

Lead time 4–8 weeks Options Full-colour print · Permit numbering · PVC

PARKING & VEHICLE

UHF Windscreen Parking Tags

Thin stickers for the inside of the windscreen that open the car park barrier from several metres away.

Frequency	UHF 860 to 960 MHz (EPC Gen 2)
Read range	Several metres with a fixed UHF reader, depending on the reader and windscreen
Mounting	Adhesive, on the inside of the windscreen
Security	Tamper-evident; stops working if removed
Note	Some heat-reflective windscreens reduce read range; we advise on placement

Lead time 4–8 weeks Options Logo and permit numbers printed · PET

Finishes and options

Every card is printed to your artwork. These finishes and extras can be added to most PVC key cards.

Hot-stamp foil

Gold or silver foil for logos and lettering. The most requested upgrade.

Spot UV

A raised gloss layer over part of the design, best on matt or dark cards.

Glitter

Gold or silver sparkle printed across the card or part of it.

Coloured core

PVC coloured all the way through, so the edges match the face.

Hologram

A holographic patch or foil that is hard to copy.

Transparent

Clear or frosted cards with the antenna visible or printed over.

Magnetic stripe

HiCo or LoCo stripe for properties running older systems alongside RFID.

Signature panel

A writable strip for room numbers or a guest signature.

Embossed numbers

Raised numbers, plain or tipped in gold or silver.

Laser-engraved numbers

Permanent numbering that cannot rub off.

Printed numbers or chip ID

Sequential numbers or each chip's unique ID printed on the card.

QR code or barcode

Variable codes printed per card, linked to the chip if needed.

UV barcode

A barcode visible only under ultraviolet light, for security.

Hole punch

A slot or hole for a lanyard, key ring or wristband.

LOCK COMPATIBILITY

Lock systems we supply cards for

These are the chips each system most often uses. Your lock model, encoder and software version decide the exact chip, so we always confirm before printing.

LOCK MAKER	CHIPS MOST OFTEN USED
Saflok (dormakaba)	MIFARE Classic 1K, MIFARE Ultralight, Ultralight C
Kaba (dormakaba)	MIFARE Classic 1K, MIFARE Ultralight family
Onity	MIFARE Classic 1K, MIFARE Ultralight family; older locks use magnetic stripe
Salto	MIFARE Classic, MIFARE Ultralight C, MIFARE DESFire
MIWA	MIFARE family on most models; send us a card to confirm
VingCard (ASSA ABLOY)	MIFARE Classic 1K, MIFARE Ultralight C, MIFARE DESFire

Lock and chip names are trademarks of their owners. Band and Key is independent and is not affiliated with these lock manufacturers. Using a lock system not listed? Tell us the make and model and we will check it.

Not sure what you have? Before you commit to a print run, we send blank cards or bands fitted with the chip we propose. Encode them on your own system and try them on your doors, pool gates and lifts.

Ready to order?

Tell us the products, rough quantities and your lock or access system. We reply within 1 business day with a written quote and a firm delivery date. Most orders take 4 to 8 weeks from artwork approval.

james@bandandkey.com

Every product is made to order and printed to your artwork. Prices are quoted on request. Specifications may vary slightly by production batch; your quote confirms the final specification. © 2026 Band and Key.
